Delivery Detail	3days-7days

## Detail Introduction :

Red pepper is a cultivated variety of vegetable pepper belonging to Solanaceae. It has an intense flavor, can remove a fishy smell from dishes, has high nutritional value, and has the effects of keeping out the cold, stimulating appetite, and sterilizing. In addition to being rich in carotene, a red pepper also contains about 5000 international units of vitamin A, which can meet the daily needs of adults. In addition, it also has more than 100 milligrams of vitamin C. These abundant antioxidants can neutralize harmful oxygen-free radicals in the body and are beneficial to human health.

style: dry

Type: Bell Pepper

Drying process: AD

Function: food ingredients

Are Dried Chili Healthy?

Like their cousins, chili peppers and bell peppers are sometimes dried and powdered. In this case, they are called paprika. They're low in calories and high in vitamin C and other antioxidants, making them a great addition to a healthy diet.
