Place of Origin	China
Min.Order Quantity	100
Payment Terms	T/T,L/C,D/P
Supply Ability	10000
Delivery Detail	3days-7days

Detail Introduction :

Cucumber is originated in South Asia and belongs to the gourd family. Having a mild refreshing taste consisting primarily of water, they are refreshing to eat in hot weather and keep the body hydrated. Furthermore, they promote detoxification by helping the body pass out more urine and remove toxins. Cucumber carries many essential nutrients such as vitamin A, B, C, K, manganese, copper, and potassium. These give cucumbers the health benefits of preventing cardiovascular disease, enhancing vision, treating cancer, and maintaining adequate blood pressure. In addition, cucumber contains lignin, an anti-inflammatory element that boosts immunity.

As cucumber is 90% water, dehydration is the best way to preserve this vegetable with significantly reduced size and weight. Once rehydrated in water, add the cucumber to salad or pickled.

Product size: 1-3, 3x3, 5x5, 8x8, 10x10mm, pieces, granule

Packing: Inner double PE bags inside and carton outside, 20kg/carton

Storage condition: Sealed in dry, cold, waterproof & ventilated condition

Certification: ISO9001, ISO22000, BRC, KOSHER, HALAL, FDA. GAP

Noted: The size and packing of products can depend on buyers' requirements

You may be concerned about these issues

1.How long can I keep dehydrated cucumbers?

Some studies have shown that dehydrated vegetables can even last up to 10 years when prepared and stored correctly! This is fantastic compared to some canned foods, which can last less than five years. Just make sure you qualify, dry and store your produce correctly.

2.Are dehydrated cucumbers good?

Cucumbers are easy to preserve, much like plums or nectarines. It is therefore logical that eating dried cucumbers is equally delicious. You can also put any flavor you want on the fruit. Savory or sweet, both work well on cucumbers.
