You may be concerned about these issues

1. Can you cook with dehydrated vegetables?

Dehydrated vegetables are best used as soups, casseroles, sauces, and stews. However, what may serve them and the addition of butter, cheese sauce, or herbs to enhance flavor. Dehydrated vegetables that have been refreshed take less time to cook than fresh vegetables.

2.Are dehydrated vegetables still healthy?

Dehydrated foods also maintain their nutrients for much longer than their fresh counterparts.

Research shows that fresh produce loses its vitamin, mineral, and antioxidant content within a few days of refrigeration — with reductions as high as 50% for some nutrients.
