Detail Introduction :

The nutrients in apples are soluble and easily absorbed by the body, so they are known as "living water," which helps to dissolve sulfur and make the skin smooth and soft. Apples contain copper, iodine, manganese, zinc, potassium, and other elements, which have the effect of lowering cholesterol, calming sleep, and relieving fatigue.

1. Lower cholesterol

Apples contain more potassium, which can combine with the body's excess sodium and make it excreted, keeping the blood sugar stable and effectively lowering cholesterol.

2. Calms the mind and sleep

Apples contain elements such as phosphorus and iron, which are easily absorbed by the intestinal wall and have the effect of nourishing the brain and nourishing the blood, calming the mind, and calming sleep.

3. Relieve fatigue

Acidic liquid accumulation in the body for a long time will make people feel fatigued, the body will feel tired and weak, and apples contain sugar, potassium ions, tartaric acid, which can dissolve the acidic liquid acid root, reduce the acidity of the liquid, so as to achieve the effect of relieving fatigue.

4. Beauty and skincare

Apples are rich in vitamin C, which can inhibit the formation of melanin in the skin. Regular consumption of apples can eliminate skin discoloration, increase hemoglobin and delay the aging of the skin.

Product Name: frozen apples

Inspection basis:Q/LHT0002S-2019

Specification: Slice 5-7mm, Dice 5*5mm, 10*10mm

Color: keep the original color of apples

Aroma Pure, delicate fragrance, with the inherent taste of apples

Impurities: No visible external impurities

Moisture ?7.0%

Sulfur dioxide ?0.1g/kg

TPC ?10000cfu/g

Coliforms ?3.0MPN/g

Salmonella:Negative in 25g

Pathogenic: NG

Packing: Inner: Double layer PE bag, hot sealing closely

Outer: carton, not nailing

Shelf life: 24 Months

Storage: Stored in closed spaces, keep cool and dry

Net Weight: 10kg/carton

Are apples good after they freeze?

If you prepare them properly, your apples should keep well frozen for several months and not taste dried-out or bitter when thawed. Keep in mind that frozen apples are best used in recipes because freezing changes their texture, making them unsuitable for eating raw.

How long is a frozen apple good for?

3-6 months

Frozen fruit will keep for 3-6 months in the freezer. If it's kept any longer, it might start to lose its flavor a little, or the texture may deteriorate.

How do you defrost frozen apples?

Simply move them from the freezer to the fridge and let them thaw slowly, at least overnight. Slow thawing preserves the apple's tissues, preventing the apples from having excess moisture and a soggy, bruised texture when used in baking.
