How do you defrost frozen figs?

How To Thaw Frozen Figs. To defrost the figs, remove the container or bag from the freezer and place it in the fridge. It is best to put the container or freezer bag onto a plate or in a bowl to catch any water running off during thawing. Leave overnight to defrost.

How do I use frozen fresh figs?

Frozen figs make a fabulous addition to baked goods, like bread or muffins, where the fruit is simply stirred into a batter or used in a filling. They can also be used in smoothies, homemade ice creams, jams and other preserves, and fruit sauces.

How long do frozen figs last in the freezer?

Yes, you can freeze figs. Frozen figs will last for 9-12 months in the freezer if stored properly. You can use them throughout the year and enjoy their rich taste.

Can you eat frozen figs?

Thaw the figs and eat them directly. If you enjoy figs and they were frozen in a sugar syrup, they will be delicious as they are. However, if they were frozen straight, without a syrup of any kind, they may be too watery to eat on their own.
