Detail Introduction :

Frozen sliced kiwis are the product of kiwis grown in Chile. The fresh fruits are sorted, peeled, sliced, and frozen on the farm in order to guarantee optimum quality. The kiwi slices are then sorted a second time and packed here in our production facilities.

Kiwi: The world's largest consumption of the first 26 kinds of fruit, Kiwi is the most comprehensive. The content of Vc, Mg, and trace elements in kiwifruit fruit was the highest. Among the top three low-sodium and high-potassium fruits, Kiwi is at the top of the list because it contains more potassium than bananas and citrus. At the same time, the content of Ve and Vk in kiwifruit was determined to be excellent, low in fat, and no cholesterol. According to the analysis, kiwi fruit vitamin content per 100 grams of fresh samples in general 100-200 mg, high up to 400 mg, about 5-10 times the citrus; sugar 8-14%, acid 1.4-2- 0%, but also with tyrosine and other amino acids 12 species. Kiwi fruit contains a wide range of nutrients; most of the fruit is rich in one or two nutrients, but each Kiwi can provide 8% DV folic acid, 8% DV copper, 8% pantothenic acid, 6% Fresh, 4% DV iron and vitamin B6, 2% DV phosphorus and Va as well as other vitamins and minerals. Kiwi, in addition to kiwi alkali, proteolytic enzymes, tannin pectin, and sugar and other organic matter, as well as calcium, potassium, selenium, zinc, germanium, and other trace elements and the human body needs 17 kinds of amino acids, but also rich in vitamins, Fructose, citric acid, malic acid, fat. A kiwi can provide a day more than twice the demand for vitamin C, known as the "king of fruit." Kiwi also contains good soluble dietary fiber, as the fruit of the most eye-catching place is contained in its superior antioxidant properties of plant chemical substances sod, according to the US Department of Agriculture research report, kiwi comprehensive antioxidant index in the Fruits among the top, second only to the thorns, blueberries and other small fruit, far stronger than apples, pears, watermelon, citrus, and other daily fruits. And blueberries belonging to the second generation of fruit are quite representative. Compared with sweet orange and lemon, kiwi fruit contains vitamin C ingredients that are two times the first two fruits, so often used to fight against scurvy. Not only that, Kiwi can stabilize mood, lower Cholesterol, help digestion, prevent constipation, as well as thirst and diuretic and protect the role of the heart.

Product: IQF Frozen Kiwi

Size: Frozen Kiwi Whole

Cut:1/2 cut,1/4 cut,1/6 cut,1/8 cut.

Slice:Diameter 30-60mm,Thickness:6-8mm,8-10mm,10-15mm.

Dice:8*8mm,10*10mm,12*12mm,15*15mm etc.

(As per the clients' requirements.)

Varieties: Hayward, Qinmei, Xuxiang, etc

Packing: Outer package: 10kgs carton

Inner package: 10kg/bag, 5kg*2bag, 2.5kg*4, 1kg*10bag, 500g*20bag

(As per the clients' requirements.)

Container loading: 20ft reefer container: 10-12 MT

40ft reefer container: 20-24 MT

Certificate: ISO, HACCP, BRC, KOSHER, Global GAP, HALAL certificates

Supplying period: All year round

Transporting and storing temperature: -18°C

Minimum Order Quantity: 1 x 20' FCL

Payment Term: 30% T/T deposit, 70% balance against seeing the copy of the B/L.

Lead Time: Within 7-15 days after receipt of 30% T/T deposit.

What happens when you freeze Kiwi?

FREEZING KIWIFRUIT

Kiwi is high in acid. Adding sugar improves flavor and helps to keep the fruit firm. Slices may be frozen individually by placing them on a cookie sheet or tray and freezing. When frozen, package in freezer-weight bags.

Can you eat frozen Kiwis?

All in all, freezing Kiwi for either cooked or blended dishes is fine, but eating it as-is or in a fruit salad is iffy. Suppose you'd like to go with the latter, thaw, and strain the Kiwi before sticking it into the salad bowl. And make sure that thawed fruit is only a small portion of the salad.

How long can you keep frozen Kiwi?

about 10 to 12 months

How long does kiwifruit last in the freezer? Properly stored, they will maintain the best quality for about 10 to 12 months but will remain safe beyond that time. The freezer time shown is for best quality only - kiwifruit that has been kept constantly frozen at 0°F will keep safe indefinitely.
