

Frozen Melon

Specifications :

Price	Contact us
Place of Origin	China
Min.Order Quantity	100
Payment Terms	T/T,L/C,D/P
Supply Ability	10000
Delivery Detail	3days-7days

Detail Introduction :

Product name: frozen Melon

Packing:1*10 KG per carton or as customer's request

Certifications :HACCP,ISO,FDA,BRC,KOSHER

Place of Origin: China

Delivery details:10- 15 days after order confirm

MOQ:10 Metric Ton/Metric Tons

Payment: L/C, T/T, D/P

Supply:2000 Metric Ton/Metric Tons per Year

Color: Green or yellow

Size Diam: 20mm

Main Market: America, Canada, South Korea, Japan, Europe, Australia

What happens when you freeze a melon?

Melon keeps fairly well in the freezer for up to six months. After this, your melon might start to deteriorate or start to taste freezer burned. Luckily six months is just the perfect amount of time to see you through the winter months until fresh melon comes back into season.

How Long Does Frozen melon last?

Properly stored, it will maintain the best quality for about 10 to 12 months but will remain safe beyond that time. The freezer time shown is for best quality only - cantaloupe that has been kept constantly frozen at 0°F will keep safe indefinitely.

Can you eat frozen melon?

This includes cantaloupe, watermelon, honeydew, and the like. If you freeze them and then defrost them, Bannan explains that they will end up losing most of their juice, which kind of defeats the point. The only way you can really get away with using frozen melon is if you plan on adding it to your smoothie recipe.
