Place of Origin	China
Min.Order Quantity	100
Payment Terms	T/T,L/C,D/P
Supply Ability	10000
Delivery Detail	3days-7days

Detail Introduction :

The strawberries on the market are getting bigger and bigger. There are two main factors. One is that the variety is good, and the second planting technique is also improved. The "hollow strawberry" is different for the variety. The "red beauty" strawberry is large, has juicy flesh, high sweetness, and is not easy to hollow. It has a softer taste and red color. Because the density of the flesh is small and the middle of the fruit is loose, it is easy to hollow.

Product Name: IQF Frozen strawberry

Quality: A Grade

Processing: Clean sorted from fresh raw materials

Specification:WHOLE:15-25mm 25-35mm 35mm up

DICE:6*6mm 8*8mm 10*10mm 12*12mm

SLICE: 6mm 8mm 10mm(THICKNESS)

Keep Frozen at-18?

Shelf Life:24 months

Supplying period: in whole year

Certificates: BRC, HACCP, ISO,KOSHER, HALAL

Can you eat strawberries that have been frozen?

IS IT OK TO EAT FROZEN STRAWBERRIES? Yes, it is! In fact, it's more than OK! If you replace a high-calorie snack with frozen fruit, then you'll not only get your daily dose of fruit, but you'll also get a healthy and delicious snack!

Do strawberries get mushy after freezing?

That's because of the high water content these fruits contain. When they're frozen, the water expands. This ruptures the cell walls of the strawberries, so when they defrost, they can become soft and have trouble holding their shape.

How long do frozen strawberries last in the freezer?

While fresh strawberries are recommended to be eaten within 2 to 3 days when stored in the refrigerator, frozen strawberries can last up to 8 to 12 months, according to the FDA.
